

DETAILS

The APOLLONIS 420 is a versatile addition to the straw bedder and all-fodder feeder lineup, offering a unique feature: the ability to enable or disable the chopping function. This flexibility allows the machine to handle various tasks seamlessly—whether spreading short straw in cubicles, laying long straw for bedded packs, or delivering long-fiber fodder like hay and haylage.

Its advanced settings are conveniently controlled from the tractor cab through a hydraulic counter-knife system. This system adjusts the cutting length of dry materials to as short as 4 cm, depending on its position. In its raised configuration, the centrifugal force activates ejector vanes that efficiently project long straw up to 15-17 meters or evenly distribute fodder such as silage, hay, or haylage with remarkable precision.

STRAW BLOWER & FEEDER

TECHNICAL FEATURES

TECHNICAL FEATURES	UNIT	MODEL
		APOLLONIS 420
Capacity	m ³	4,2
Number of blades / kind	pcs	10 Full Circle / 80 Inserts
Rear Bucket	type	Hydraulic / Self-Loading
Blower Act	degree	300° Rotary
Blower Head Range	mt	18-15
Blower Length	mm	110
Conveyor Speed	type	Adjustable
Bale Type	type	Round or square
Loading Width	mm	1200
Overall Width	mm	2290
Length	mm	5000
Height	mm	3000
Weight	kg	1800
Pto Rotation	rev/min	540
Required Power	hp	50-40
Tire Sizes	inch	12-10.80
