

# DETAILS

Eva No-Till Mechanical Direct Seeder is trailed sowing machine which can plant seeds of all kinds of grains and all kinds of fertilizer precisely and properly on cultivated, semi-cultivated or uncultivated soils. It is manufactured as 14,18,21 and 29 rows. Thanks to its functionality to work under heavy soil conditions, it can sow seeds in all sizes precisely. The machine which is adjusted easily and has a strong structure, sows properly under all kinds of soil and land conditions. Thanks to its towed-structure, it does not need much power from your tractor.

Eva operates in the field by opening the seedbed through a set of notched cutter disc and plain disc, with these special design seeding rows, the seed and fertilizer is placed at the correct depth. Afterward, seed bed is compacted through the pressure wheels which is rims are casting. The mechanism for depth control and precision has been designed hydraulically like our Lina Seeders. The enlarged disc tine has internal scraper and pressure wheels have external scrapers that keeps the them clean. This permits the drill to work even in the wettest conditions.

Both seed and fertilizer rate adjustment are done by changing the axle speed steplessly with the gearbox. Drive is supplied by the land wheel. Additionally, we are offering End tow (transport system on road) to easy carrying of the machine.
