

# DETAILS

Stoner Stone Picker machine has been designed to remove and collect stones from cultivated lands. Our Machine specially designed to collect stones on the surface and at a depth of 30cm in the field. Stoner Stone Picker Machines range at 3 different model as their working width's 140, 175 and 200 cm, collect the stones easily from 3cm size to 40cm, the extra soil and smaller stones go through the sieve and back onto the ground. Thanks to the Hydraulic Unloading System, you can discharge stones directly into a dump trailer, a truck or in the corner of the field.

Stoner Stone Picker Machine is made of high quality material and thanks to its solid structure it will serve you for a long working life. Thanks to the vibrating screen, it provides easy operation even in moist soil. It does not take soil to its store, it easily removes the soil and increases the ability of the tractor without difficulty and thus saves fuel on the tractor. Newly designed drum system prevents spring breaks and allows long life of parts and easy replacement of worn parts.

This machine can also be used in industrial areas to clean sites and also in cleaning beach sand.
